

Cement plants demand durable Nozzles that can operate reliably in abrasive and dusty environments.

KEY APPLICATIONS INCLUDE:

- ☑ Pre-heater and gas cooling
- ☑ Dust suppression at crushers, conveyors, and transfer points
- ☑ Conditioning Towers and Kiln inlet systems
- ☑ Material moistening for improve handling

Atul Nozzles are designed to maintain Spray Uniformity even in high-temperature gases and particulate-laden flows.

# Condensing tower and killn

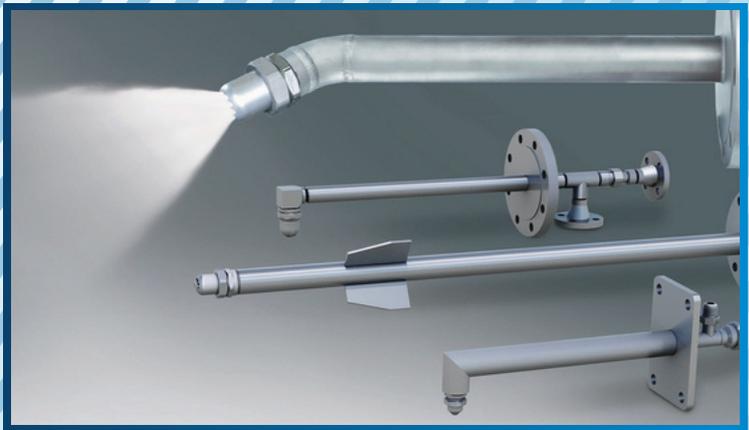

## Dust Suppressor

## Full Cone and Hollow Cone

## Spray Header and Lance
